

STRATO STOCK HANDLING MODULE

ADD-ON MODULE TO KEEP TRACK OF YOUR STOCK

Fully integrated with the rest of Strato, the Stock Handling module will help you keep track of your HIs and accessories inventory. You can also easily administer your HIs out on loan. You can register all article movements, so you can track individual items from they enter your stock via a possible loan through to sales.

At any time, you can pull lists that will provide you with an updated status at a glance. Lists may even be exported to other applications. This will free up time in the shop/clinic, so you can spend more time with your clients and the audiology work.

OPTIMIZE YOUR BUSINESS

With an easy-to-use and intuitive interface, the Strato Stock Handling module will ease your daily tasks when it comes to selling and lending hearing aids as well as general management of articles. You are always in control of both your own stock and any consignment stock.

You can even pull out detailed information about your stock that will help you optimize your business. You can analyse data from the Stock module over time, which can lead to increased revenue, lower handling costs and improved cash flows.
