The Future is Here

Step into the future of clinic management! Strato is a cloud-based clinic management system powered by Windows Azure. Fully integrated with Noah 4, Strato builds on and exceeds the features you find in Noah.

Taking Your Data to The Cloud

Being cloud-based means that Strato is delivered over the internet as a service. Your data is securely stored in your own protected part of the cloud and you can access your data from virtually anywhere. You no longer have to invest in on-site software, server maintenance or worry about data backup – and your data is always 100% updated. You only pay a low monthly fee to have access to Strato and there are no start-up costs. Storage space, integration handling, security – everything is an inherent service of the Strato solution, which means you can spend your time on customer care and not on IT management.
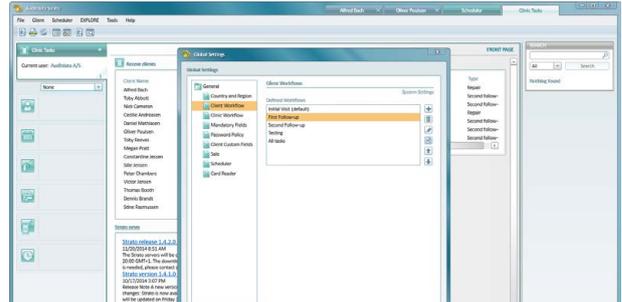

PC Minimum Requirements

Processor	2 GHz
RAM	2 GB (4 GB recommended)
Screen Resolution	1024x768 (or higher)
Network	Internet connection required, min. 0.5 Mbit
Free hard drive space	1 GB free for Strato (incl. Noah software) 1 GB free for each installed Noah module: Audiometric equipment Fitting software REM/HIT software
Operating System	Windows 7 (except for Windows 7 Starter version) Windows 8, 8.1 (not Windows RT), Windows 10
Noah	Noah 4 Engine license needed for using Noah modules in Strato*

* For further details about Noah and Noah licenses, please consult www.himsa.com

Streamline Your Business

With the built-in workflows in Strato, you can streamline your clinic workflow by setting up daily, weekly or monthly tasks depending on your needs. You can also set up standard documents or letters to clients, e.g. for yearly follow-up visits and appointment confirmations.

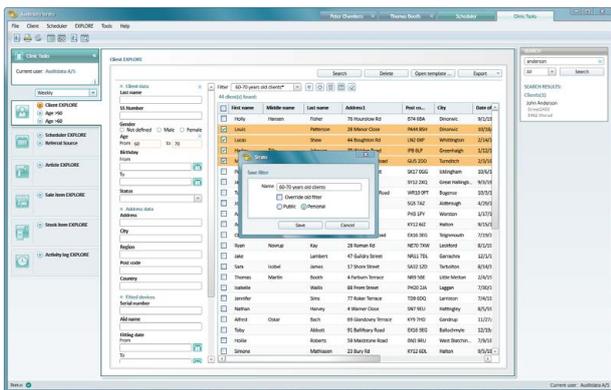

Easy Import and Export

Since Strato is fully compatible with Noah, you can import your Noah data to Strato with just a few mouse clicks.

In Strato, you also have full integration with the MS Office toolbox. Statistics, documents and reports are easily exported to Excel or Word for further handling outside of Strato using either the ready-to-use templates from Strato or your own customized templates.

Powered by Windows Azure™

Optimize Your Business

With the EXPLORE module you have all your client data easily accessible for analysis, reporting and marketing purposes. Filter your data with advanced criteria, such as fitting data or hearing loss. Save the filtered data in lists. Export your lists directly into Excel or XML for targeted marketing or reporting. This multi-purpose tool will be a key instrument in optimizing your business.

Keep Track of Stock and Loans

Fully integrated with the rest of Strato, the stock Handling module will help you keep track of your Hearing Instruments and accessories inventory. Easily administer your Hearing Instruments out on loan and register all article movements, so you can track individual items from they enter your stock via a possible loan through to sales.

Additional Advanced Features

- **Global search**
  Search for anything from anywhere
- **Fast client access**
  One-click list of recent clients
- **Stock module - add-on**
  Keep track of stock and loans
- **Invoice module - add-on**
  Customised invoicing
- **Trial version**
  Try it, before you buy it
- **Automated updates**
  Always up to date
- **In the office or on the go**
  You only need an internet connection
- **Document handling**
  Scan, upload and save documents in the cloud
- **Scheduler**
  Manage your time and your resources

The Quick Overview You Need

In Strato, you have numerous features that help provide a quick overview. You can open up two clients at a time and handle both clinical and patient tasks for each client. In the Scheduler, you can view appointments for one or multiple clinics and optimize you work time. You can view the client's Pure Tone and Speech Audiograms as well as Real Ear Measurements directly in Strato without having to open other modules. And so the list goes on.
